

Abhishek Agrawal

+91 8208693389 — abhiagrawal2309@gmail.com — linkedin.com/in/abhishek-agrawall — github.com/theabhiagrawall

Summary — Enthusiastic Java Developer with strong OOP, Java, and SQL, with hands-on experience in developing and debugging applications. Interested in applying problem solving abilities in a dynamic development environment.

Skills

Languages: C, C++, Java, Advanced java
Tools: VS Code, Eclipse, Git, GitHub
Frameworks: Spring Boot, Hibernate

Database: MySQL
Operating System: Windows, Linux
Front-End: HTML, CSS, React

Experience

Soham Global — Amravati

Jan 2025 – Mar 2025

Application Developer Internship

- Collaborated with the backend team to design and optimize SQL queries, improving database performance and efficiency.
- Contributed to building and testing backend features using Java and Spring Boot.
- Gained hands-on experience in agile development, enhancing teamwork and real-world problem-solving.

Education

Sipna College of Engineering and Technology, Amravati

2024

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.56

Government Polytechnic, Washim

2021

Diploma in Information Technology

Per: 88.19%

Shree P.D. Jain Vidyalaya, Ansing

2017

Junior School (Class X)

Per: 72.80%

Projects

FlowFi - Online Banking System

GitHub: github.com/theabhiagrawall/FlowFi-Project

Jan 2025

- Developed a scalable online banking system using Java, Spring Boot, JWT, and Micro services architecture, ensuring security and maintainability.
- Implemented role-based authentication for users and admins, enabling features like fund transfers, deposits, withdrawals, transaction history, and loan requests with approval workflow.
- Designed and integrated responsive front-end (HTML, CSS, JavaScript) with robust backend services, delivering a seamless and secure banking experience.

Uni-Info Application - University Guidance Platform

GitHub: github.com/theabhiagrawall/UniInfo-App

Jan 2024

- Developed a web application using Java, Spring Boot, MySQL, JDBC, HTML, CSS, Bootstrap, JavaScript, and Kotlin to help students select universities based on their preferences and qualifications.
- Implemented college prediction logic using CET ranks, along with features for detailed university information, digital brochures, and study notes, providing students with a centralized guidance platform.
- Enhanced accessibility by integrating digital brochures and notes, offering students a comprehensive academic resource hub.

Certification

- Java Full Stack Developer - Qspider
- Web Development - Udemy
- Packet Tracer - Cisco
- JavaScript – Udemy
